

Chromebooks

Education discounting for students/parents

BCOM Computer Centre has extended education discounting for parents of students attending Black Gold School Division on education-qualified Google Chromebooks for student use. Chromebooks are versatile and cost-effective computing devices which meet the recommendations for student BYOD (Bring-Your-Own-Device).

The Lenovo N22 Chromebook including 1-Year BCOM Same-Day Warranty is currently available for parent purchase at **\$249.95** (discounted by \$50 from MSRP \$299.95), plus \$1.20 Alberta Electronics Recycle Fee and GST.

The Lenovo N22 Chromebook provides up to 10 Hours of computing powered by Intel® Technology. This system is designed for education with reinforced casing, ports and hinges to stand up to student wear and tear. A reversible web-camera allows the camera to face forward or back, enabling students to use apps like Skype, in addition to taking video or pictures of science projects or whiteboard notes. A full size US-English keyboard enables full productivity and a laptop computing experience - Google Docs are at your fingertips!

To purchase (or for more information), parents may Register on BCOM's Education Portal (link below).

Be sure to use the school access code below while registering to access the discount!
